---

John, I had a conversation with Dipa and understand that human health was not an issue but there was some stuff needed to address eco. I need to know if there is anything in the risk assessment that would require more than the work we plan to get done via an AOC for removal of tanks and cap repair. Gary Miller advised me that we will need ICs and monitoring. If we need something done to address eco risk, it would have to be included in the AOC, also, in order to clear a path for a "no further action ROD." I asked Gary if ICs and monitoring would still qualify as a "no further action ROD."

Please brief me on the details of the risk assessment. Thanks

Sam and Jim (HQ) had a hall way meeting on Gulfco CC. Jim will be supporting us pushing for FY2010 CC. We need to move forward with our plan and meeting goal. Also, make sure that ROD and other activities is on a FY2010 Critical Path Work Plan.
